

Maryland Safe Storage Map

This map was developed by Marylanders to Prevent Gun Violence and the Johns Hopkins School of Public Health to help community members seeking local options for temporary, voluntary firearm storage. Out-of-home gun storage can be especially helpful to persons in crisis at risk for suicide. As of the spring of 2020, the businesses and law enforcement agencies listed on this map were willing to consider requests for temporary, voluntary gun storage. <https://mdpgv.org/safestoragemap/>
